

LIN-SA1: Linux System Administration II

The purpose of this course is to provide a foundation for understanding and implementing Linux as a server option using CentOS / Red Hat Enterprise specifically. The content has been developed in order to provide the level of information needed for understanding the RHCE exam for Red Hat. This course is not designed to help students pass the RHCE, but the content covers most of the RHCE topics. About 25 Labs are available during the course. Step by step tutorials will be supplied to facilitate rapid knowledge levels in the workplace.

This is the second 40 hours of instruction in Linux Server Administration. The focus of this course is a step by step approach to the installation and configuration of services which an organization can use to enhance their business.
